

Tomás Pablo Bozzini

Tandil, Buenos Aires, Argentina | tomasbozzini76@gmail.com | Availability: Part-time (10–20 hours/week) | Remote or hybrid in Tandil

SUMMARY

Advanced Systems Engineering student at UNICEN, Tandil, currently in the final stage of the degree. I develop web and desktop applications using Python and React, integrating AI (LLM APIs) into real-world projects. I hold 5 international Cambridge English certifications. Self-taught learner with an analytical mindset and the ability to take a project from end to end — from design to delivery.

EDUCATION

UNICEN — Faculty of Exact Sciences, Tandil

Information Systems Engineering

Mar 2020 – Present

Analítica Noviembre

Data Analytics on Cloud Platforms

Apr 2024 – Jul 2024

Colegio Santo Domingo en la Sierra, Tandil

Bilingual High School

2017 – 2019

EXPERIENCE

Manager & Web Developer

Posada La Misericordia

Jan 2019 – Present

Tandil, Buenos Aires

- Designed and deployed the official website using Astro + Netlify.
- Managed listings on tourism platforms (Booking, Airbnb, etc.).
- Handled accounting and social media advertising.

PROJECTS

Food & Beverage Ordering Platform — In Development | React · Vite · Supabase

- Multi-tenant online ordering system for food and beverage businesses in Tandil, featuring customized templates for each client. Currently developing the "Osteria" template for La Sirena.

Sports Club Management System | Python · CustomTkinter · Supabase · PostgreSQL

- Multi-tenant desktop application (schema-based isolation) for bookings and administration of sports clubs. Developed independently and presented to the board of a sports club in Tandil. Current version: v1.3.11.

MediConsulta — Medical Management System | Python · CustomTkinter · SQLAlchemy · Supabase

- Comprehensive system for medical practices, including appointment scheduling, patient records, consultations, and treatments, with secretary roles and multi-doctor scheduling.

AI Legal Document Analyzer | Python · Streamlit · Groq API (LLaMA 3.3 70B) · PyMuPDF

- Web-based tool that extracts text from PDFs and analyzes them using AI, identifying problematic clauses and generating questions for the user.

AI-Powered B2B Lead Automation Pipeline | Make.com · SerpAPI · Apify · Claude API · HubSpot CRM · Trello

- End-to-end sales prospecting automation including lead scraping and data enrichment, AI-powered qualification, and personalized email generation, integrated with CRM and follow-up task management.
